Patent No. 5831017
GENERAL INFORMATION:
APPLICANT: HOFfmann, James Arthur
TILE OF INVENTION: OBESITY PROTEIN ANALOG COMPOUNDS AND
TILE OF INVENTION: FORMULATIONS THEREOF
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     ; OTHER INFORMATION: /note= "Xaa at position 28 is Gln; OTHER INFORMATION: or absent;" US-08-788-943A-1
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      COMPUTER READABLE FORM:
MEDIUM TYPE: Floppy disk
COMPUTER: IBM PC compatible
CURRENT APPLICATION DATA:
APPLICATION NUMBER: US/08/788,943A
FILING DATE: 24-JAN-1997
CLASSIFICATION: 530
ATTORNEY/AGENT INFORMATION:
NAME: CALLINGET, Steven P
REGISTRATION NUMBER: 36,467
REFERENCE/DOCKET NUMBER: X10540
TELEPHONE: (317) 276-0757
TELEPHONE: (317) 277-1917
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               NUMBER OF SEQUENCES: 15
